Children's Museum Hosts Student Team who has been selected a NASA finalist! Announced Saturday, March 20th Press Conference at 10:30am & on Exhibit at our March 27, 2010 Science & Technology Fair

The Children's Museum of History, Science & Technology at 311 Main Street in Utica, is proud to announce that a student team project we are hosting has been named a finalist in a NASA (National Aeronautics and Space Administration) nation-wide contest.

Student teams were invited to design a water recycling system for the unique environment of the moon, for future astronauts who will be living and working on the Moon. This project has been chosen as one of the top twenty finalists in the country.

On Saturday, March 20th, at 10:30am at The Children's Museum, the student group and their mentor unveiled their project exhibit and did a short presentation on their system design. In April, they will present from the museum to a panel of NASA judges. After this, their exhibit will be on permanent display at our museum.

In a recent study, the National Academy of Sciences concluded "To be prepared for today's workforce, and able to understand the complex world in which we live, all Americans must have a solid *education in science, mathematics, and technology*".

This project was also among this year's Children's Museum Science & Technology Fair exhibits, March 27th, 2010, which featured 15 student entries (30 students) from – among others - the Rome, Utica, Boonville, and New Hartford school districts.

Our museum's mission of "Learn, Create, Experience" helps stimulate young imaginations and strengthen families by promoting the importance of science, technology and cultural understanding through our exhibits, activities and programs. Children's museums are fun, interactive, inclusive environments where lifelong learning is nurtured by the general rule of Please Explore & Touch.

We have respectfully requested funding for programs from the City, the County, the state, federal, and United Way (none of which we receive at the present time).
