A Congressional Commission on Advancement in Science, Engineering and Technology Development in its SET report, said "Student interest in mathematics and science must be stimulated, short-term solutions to the national shortage of STEM [Science, Technology, Engineering & Math] workers must be implemented, including programs that provide academic enrichment to students, helping them see math and science as interesting and fun". President Obama in his State of the Union Address said: "In a global economy where the most valuable skill you can sell is your knowledge, a good education .is a pre-requisite. .we know the countries that out-teach us today will out-compete us tomorrow. We have dramatically expanded early childhood education and will continue to improve its quality, because we know the most formative learning comes in those first years of life". www.museum4kids.net

Come back & visit us often to interact with our educationally enjoyable exhibits as we continue to grow! And purchase tickets from us for the Saturday, April 14th, 2012 Mayor's Benefit Gala to be held at the Radisson. Our museum is a co-recipient of funds earned!
